

IoT Acceleration with **Flex-Fast** No-Code Dynamic Custom Application Creation

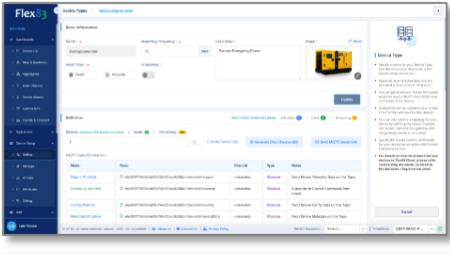

The Flex83 **No-Code IoT Application Creator** dramatically cuts the time, cost, and complexity for IoT application creation with an intuitive, click-to-configure, yet very powerful path to rich IoT solutions. Using the Flex83 No-Code solutions, simply point your IoT devices (using secure protocols) to Flex83, provide intuitive configuration, and a professional grade IoT application is dynamically created.

no-code IoT application
ENABLEMENT Click Through 9 No-Code Intuitive Steps to build a complete professional-grade, multi-device, multi-role, scalable, secure and highly configurable IoT solution.

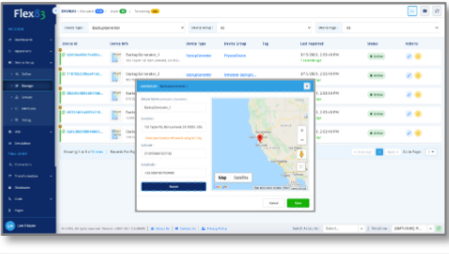

1

Instantiate Device Types

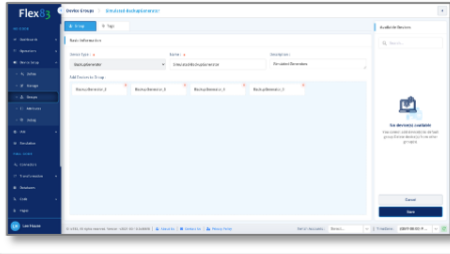

2

Configure Device Details

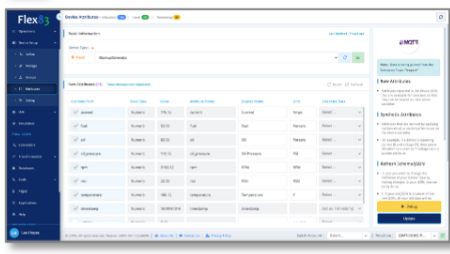

3

Logically Group Devices

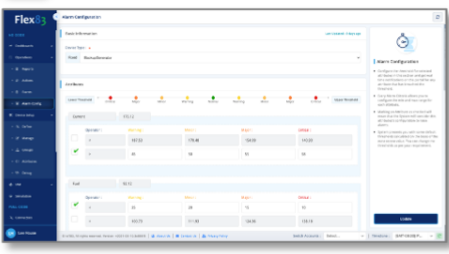

4

Configure Telemetry Data

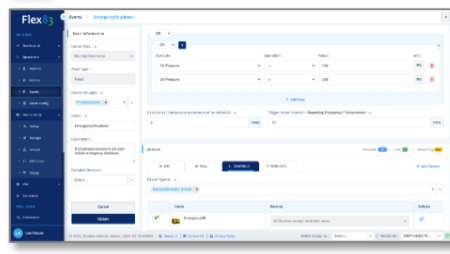

5

Configure Data Thresholds

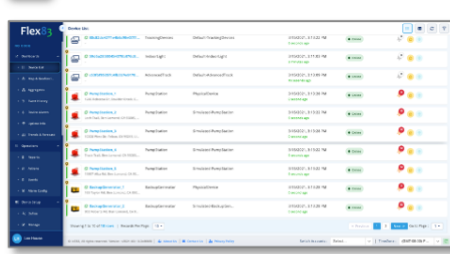

6

Set Up Conditional Actions

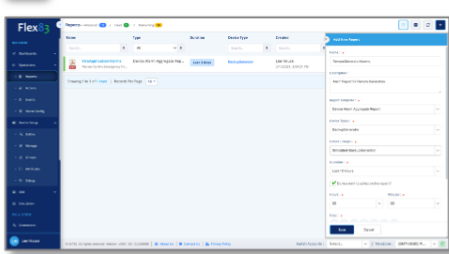

7

Build Automated Actions

8

Set Up Automated Reports

9

Build Custom Dashboards

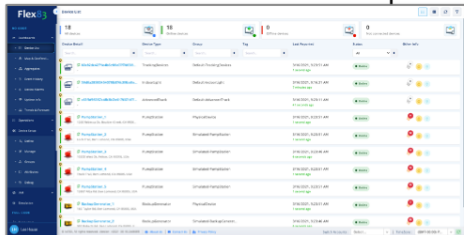

Once Configured, Flex83 **Dynamically Creates** Your Full IoT Application.

<https://www.iot83.com>

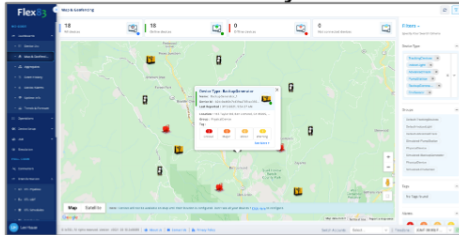

dynamically created APPLICATIONS

The Flex83 No-Code Application Creator builds a complete set of professional dashboards to provide you with in-depth visibility to all device telemetry data with multiple system level optimization tools.

Search, Filter, and Manage all IoT Devices & Device Groups

Map & Geofencing for devices & drill-down visibility

Device Detail Page for Device Summary Information

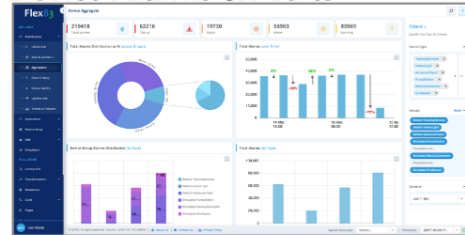

Drill-Down Visibility to all the Data & Details for each Device

Analytics Dashboard for IoT Insights & System Optimization

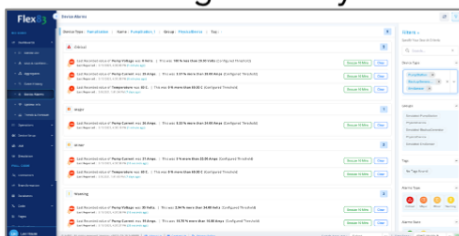

System-Wide Aggregation of Device Alarms & Alerts

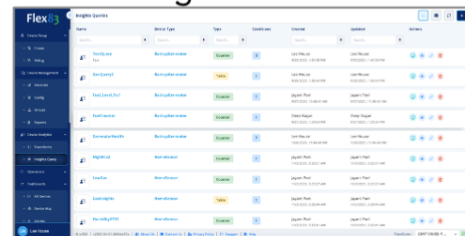

Device Connectivity Tracking to Manage System Reliability

Alarms, Alerts, and Automation Event Tracking across System

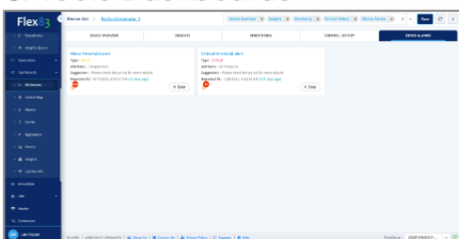

Custom Query Builder for Custom Insights & Automation

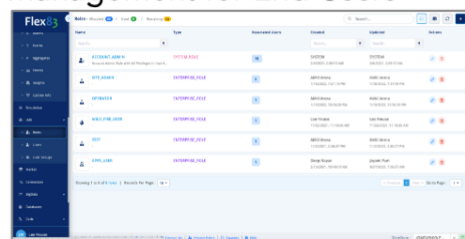

Device Telemetry Trending and Forecasting of Behavior

Alarms & Events Management & Tools Dashboards

Role-Based Identity Access Management for End Users

The Flex-Fast Solution is rich, configurable, scalable and **EXTENDABLE**.

The Flex83 No-Code Application Creator is an ideal way to launch powerful new IoT services or to streamline existing operations. Simple to configure, launch, scale and manage for fast results.

an accelerated start to
IOT TRANSFORMATION

iot83 *is* engineering
ENABLEMENT

Using our No-Code solutions or extending leveraging the IoT83 complete platform & low-code application enablement suites, the Flex83 solution is a revolutionary path engineering enablement and business success.
